

Nikko Calumpiano

Full Stack Software Engineer (TALL Stack)

📍 Imus, Cavite, Philippines | 📞 +63 931 991 4266

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with a proven track record of architecting and deploying complex, enterprise-grade applications from the ground up as a solo developer. Expert in the TALL stack, relational database design, secure payment integrations, and CI/CD pipelines. Highly specialized in translating fragmented business operations into unified, automated digital ecosystems that eliminate manual data entry and optimize financial workflows.

CORE TECHNICAL COMPETENCIES

- **Backend & Architecture:** PHP, Laravel, Livewire, RESTful APIs, Object-Oriented Programming (OOP)
- **Frontend UI/UX:** JavaScript, Alpine.js, Tailwind CSS, HTML5, CSS3, Dynamic State Management
- **Database & Infrastructure:** MySQL, Complex Query Optimization, Git, SSH, CI/CD Deployment Pipelines, Cloud Server Configuration
- **Domain Expertise:** Enterprise Resource Planning (ERP), Payment Gateway Integrations (PNB), Payroll Automation, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Lead Software Engineer / Systems Architect

M7 Group & M7 Philippine Cambridge International School Inc.

April 2024 – Present | Imus, Cavite

Operated as the sole technical lead and developer to architect, build, and maintain a centralized ERP system that completely digitized the institution's operations, alongside developing primary corporate web platforms.

- **Finance & PNB Payment Integration:** Engineered a highly secure Finance and Payment module, successfully integrating a direct bank transfer payment option in partnership with Philippine National Bank (PNB) to streamline tuition collection and automate institutional cash flow.
- **Corporate & Institutional Web Platforms:** Developed and deployed the official public-facing websites for the M7 Group corporate entity (m7group.com.ph) and the PCIS institution (pcis.edu.ph), ensuring highly responsive UI/UX and brand consistency.
- **Automated HR, Attendance & Payroll:** Developed a comprehensive human resources system that automatically links daily employee attendance tracking to complex payroll calculations, integrating dynamic tax formulas and mandatory government deductions (SSS, PhilHealth, Pag-IBIG).
- **Role-Based Admissions & Registration:** Built a secure, multi-tenant routing system ensuring strict data isolation between applicants, registrars, and administration during peak enrollment periods.
- **Academic Grading Module:** Engineered dynamic algorithms that instantly compute weighted student averages and automatically generate secure student report cards.
- **Library & Inventory Management:** Deployed an automated Library System for efficient physical asset tracking, book circulation, and real-time inventory metrics.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology (BSIT)

ACLC College Sorsogon - Sorsogon City

June 2020 – July 2024

- **Honors:** Awarded Best Programmer of the Class & Best Capstone Project.

Professional Certifications

- **The Full Stack Web Development Bootcamp (Frontend & Backend)** – Udemy (39 Hours, Dec 2023)
- **JavaScript Fundamentals to Advanced: Full Stack Development** – Udemy (Aug 2025)
- **HTML, JavaScript, & Bootstrap - Certification Course** – Udemy (Aug 2025)

TECHNICAL PORTFOLIO

- **Core ERP Architecture:** Live production environment handling complex multi-table relational data for hundreds of daily active users.
- **Automated Financial Dashboards:** High-fidelity, responsive data visualization interfaces built for real-time tracking of institutional ledgers.

** Comprehensive architectural diagrams and sanitized application screenshots available upon request.*
